Comments:

6/20/2001 - Inspected site per operator request for file closure. Site is satisfactory. There are a few sparse areas of vegetation, but there is not much can be done becuase of the pumice being so white and the slopes so steep. Inspector recommends file be released.

3/5/2001 - Received letter from SITLA stating lease was canceled 2/12/98 because reclanmtion was complete. Opeortor may desire to obtain a new lease from SITLA & re-open the mine. It was determined to leave the DOGM mining permit open. The State has traded all its rights and interest to the federal government. Opeartor must obtain a new lease and post a reclamtaion bond with the BLM before re-opening the mine.

2/13/2001 - Received notice from SITLA that this land was transferred to BLM in West Desert Exchange - January 2001.

1/4/2001 - Received 2000 annual report stating mine inactive. Reclamation work completed & seeded. Site inspected & determined more time
